

PHILIPPS & BYRNE

Principal Technology Consultant Tech Due Diligence (w/d/m)

We

- are one of the top experts in Europe for Tech Due Diligence for VCs and startups
- have performed more than 300 DDs in 25 countries
- have worked with companies such as Lakestar, Accel, HV Capital, HomeToGo, The Female Company and many others
- are lean, fast, and despite being relatively small (yet) have a lot of horsepower
- truly practice what we preach: Agile, courageous, honest - No bullshit. :)

You

- possess a natural curiosity and a drive to learn something new every day
- are either a former startup CTO, or VP Engineering at fast-scaling startups or otherwise a consultant of several years who has performed Tech Due Diligence
- have an excellent understanding of technology, on both conceptual and practical level
- know how to translate business models into strategic implications on technology
- understand how Engineering organisations need to be built in order to scale
- are a person of highest integrity, discreet, thorough and absolutely trustworthy
- understand that a serious work ethic and having fun are no contradiction
- are emotionally and intellectually smart but humble
- speak and write English fluently

Together

- we conduct Tech Due Diligence and health checks and consult VCs and startups on whether to buy or invest into technology companies
- we assess new technology, architectures and teams against industry best practices
- we help startups to get ready for scale and success
- we are trusted advisors and sparring partners for founders, CTOs and investors
- we work on our standards and tooling to ensure we deliver holistic, data-driven kick-ass results within just a couple of weeks or even days

We are based in Berlin, Germany but are a remote-first company (office or home office). You should be ready to attend an off-site with the team once every quarter. Due to Covid-19, we conduct almost all of our DDs per remote communication, but post-covid you should be willing to travel every couple of weeks. Compensation is adequate, work ethics are result-oriented. Principles of mastery, autonomy and purpose are valued. Diversity is highly valued, applications from people of various ethnical and gender backgrounds are appreciated!

If this resonates with you, get in touch with us and send us your profile and tell us about why you are interested in working with us: Please contact Chris and say hello@philipps-byrne.com
